

# COPTERING

## About Us

Founded in 2011, **Coptering** is an aviation company based at **Sabadell Airport** with over **13 years of experience**. The company offers **passenger transportation, pilot training, aerial work, and specialized helicopter maintenance services**.

Operating a modern fleet of **7 helicopters** and **1 flight simulator**, the company is certified under **ATO, SPO, AOC, CAMO and Part 145**. Its maintenance unit is authorized to support its own fleet and third-party aircraft, ensuring high quality, safety, and regulatory compliance standards in accordance with the European Union Aviation Safety Agency (EASA). **Safety is our number one priority**. Every operation is carried out with a rigorous, prevention-focused approach to guarantee reliability and excellence in every service. Coptering's technical team performs **inspections, repairs, and CAMO management** to ensure maximum airworthiness.

## Aerial Services

Power Line & Gas Pipeline Inspection

Aerial Filming: Photography & Video

HESLO Cargo & Freight Transport

Aerial Photography, Photogrammetry & LIDAR

Firefighting Operations – COE

## Aerial Thermographic Inspection of Power and Gas Lines

At Coptering, we combine **advanced technology**, **aeronautical expertise** and **agile operations** to provide aerial thermographic inspections that identify thermal anomalies before they lead to critical failures.

**Our mission** is to ensure electrical service continuity by optimising time and minimising risk.

## Next-Generation Thermographic Technology

We use **Trakka SWE-300** high-resolution thermal gimbal, which is designed to capture precise **thermal images** even in extreme conditions. This technology enables us to identify:

- Electrical hotspot inspection
- Defective connections
- Potential failures without physical contact

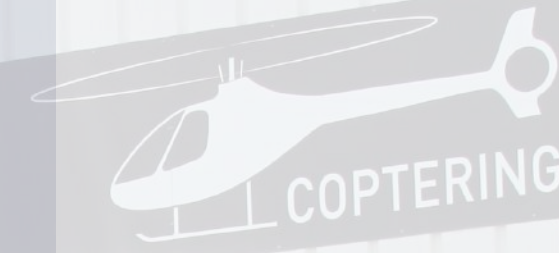

DANGER / PELIGRO

**Fast, safe and effective diagnostics.**

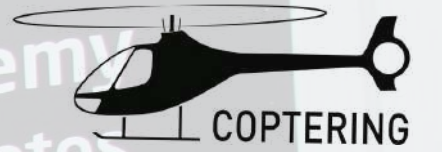

## Our Aircraft Fleet

We operate **4 versatile helicopters**, ready to adapt to all types of terrain and weather conditions:

Flight Academy  
Escuela de Pilotos

### Airbus H125 B3 E

This powerful and adaptable helicopter is ideal for carrying out inspections in hard-to-reach areas. (2 units)

### Airbus AS355 N TwinStar

It has twin engines for maximum safety and stability during critical missions. It is certified to fly over congested areas. (2 units)

# Optimized Ground Logistics

Our service doesn't end when you reach the air. We provide a robust ground infrastructure to ensure seamless and uninterrupted operations.

## Technical Support Vans

To facilitate on-site operations.

## 20,000-Liter Fuel Tank Truck

To enhance flight autonomy and minimize downtime.

Flight Academy  
Escuela de Pilotos

**Jordi Gardela**  
Director of Operations
